FORM  
FTD SEP 63 0-329 (TDE) Previous editions of this form may be used.

14. Did the object disappear while you were watching it? If so, how?

The second object did. It moved north till I couldn't see it anymore. (Explained on last page)

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes  No  Don't Know. IF you answered YES, then tell what it moved behind:

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes  No  Don't Know. IF you answered YES, then tell what in front of:

17. Tell in a few words the following things about the object:

a. Sound ~~none~~ none

b. Color ~~first 30 objects - brownish; second object - dark colors~~

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

a) ~~1/2 of the~~ ~~about~~ ~~30 objects~~ (2 of each individual object)  
 b) all of the second object (singular object)

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.

20. Do you think you can estimate the speed of the object?

(Circle One) Yes  No

IF you answered YES, then what speed would you estimate? \_\_\_\_\_

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes No 1st objects - about 200 ft, going up.

IF you answered YES, then how far away would you say it was? 2nd object - no

22. Where were you located when you saw the object?

(Circle One):

- a. Inside a building
- b. In a car
- c. Outdoors
- d. In an airplane (type)
- e. At sea
- f. Other \_\_\_\_\_

23. Were you (Circle One)

- a. In the business section of a city?
- b. In the residential section of a city?
- c. In open countryside?
- d. Near an airfield?
- e. Flying over a city?
- f. Flying over open country?
- g. Other residential near water - national airport - they were planes

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

- a. North
- b. Northeast
- c. East
- d. Southeast
- e. South
- f. Southwest
- g. West
- h. Northwest

24.2 How fast were you moving? \_\_\_\_\_ miles per hour.

24.3 Did you stop at any time while you were looking at the object? \_\_\_\_\_

(Circle One) Yes No

does not apply

25. Did you observe the object through any of the following?

a. Eyeglasses	Yes	No	e. Binoculars	Yes	No
b. Sun glasses	Yes	No	f. Telescope	Yes	No
c. Windshield	Yes	No	g. Theodolite	Yes	No
d. Window glass	Yes	No	h. Other	_____	_____

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

1st 30 objects - like a cross between a goose and these little 10 ft wooden airplane gliders.

2nd object - a dim star or possibly a small piece of ash - there was a fire near by.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you first saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you last saw it. Place an "A" on the compass when you first saw it. Place a "B" on the compass where you last saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? about 30

Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

NO

31. Was anyone else with you at the time you saw the object? (Circle One)

Yes

No

31.1 IF you answered YES, did they see the object too? (Circle One)

Yes

No

31.2 Please list their names and addresses:

33. When and to whom did you report that you had seen the object?

Sept 25 OR 25 — Sept OR 1965  
 (Date) Day Month Year  
 (week not clear)

34. Date you completed this questionnaire:

30 Dec 1965  
Day Month Year

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

The questions are not adequate enough for my story. I was working windows and I looked up to see about 30 objects which appeared to be geese. However closer looking showed the objects ~~to be~~ not to be acting as birds (the wings weren't flapping). It's hard to explain by writing it but they had none of the characteristics of a bird (no movement of the body, etc.). They appeared to be hitting into each other. They flew in a circle and at the same time were gaining height. I went in, after watching for about ~~2~~ ~~one~~ minutes from the time I first saw them (maybe 1 minute), and got my telescope. I came out 1-2 minutes later, & they were out of sight. I then noticed an object like a dim star moving from about the spot the 30 objects had seemed to rise to. The bright object moved in a northern direction. My father also saw the 30 objects (OVER)

The bright object I ~~said~~ I saw must be ~~does~~ discussed. Now some leaves etc were burning not far from me. And I saw a number of ~~was~~ <sup>the</sup> leaves fly over me. It is reasonable to allow for the fact that the bright object might have been an ash. However I clearly saw the approximately 30 objects which, by the time I returned outside, were gone. My father also saw these 30 objects (he only watched for about 30 seconds). He didn't see the bright object. Again it is very possible that it was an ash (the bright object, I mean).

That's about the best I can do - the drawing should not be so fat - the object were streamlined

I am forwarding the reports received in the Houston area since 26 October 1965 for your information only. I do not feel any of them are unusual enough to justify complete investigations based on previous experience. UFO activity has slowed down considerably and I therefore held the reports until I had enough to forward. I will continue with this procedure just to give you an idea of the UFO activity in this area. I will forward any very unusual reports immediately after completion of local investigation.

14 December 1965

SUBJECT: Transmittal of UFO Information

TO: Foreign Technology Division  
Wright-Patterson AFB, Ohio  
ATTN: Major Hector Quintanilla

I am forwarding the reports received in the Houston area since 26 October 1965 for your information only. I do not feel any of them are unusual enough to justify complete investigations based on previous experience. UFO activity has slowed down considerably and I therefore held the reports until I had enough to forward. I will continue with this procedure just to give you an idea of the UFO activity in this area. I will forward any very unusual reports immediately after completion of local investigation.
